Independent Auditors' Review Translated from Chinese

To the Board of Directors and Stockholders of Innodisk Corporation:

## Introduction

We have reviewed the accompanying consolidated balance sheets of Innodisk Corporation and its subsidiaries (the "Group") as of June 30, 2021 and 2020, the related consolidated statements of comprehensive income for the three months and the six months ended June 30, 2021 and 2020, the consolidated statements of changes in equity and cash flows for the six months ended June 30, 2021 and 2020, and notes to the consolidated financial statements (including a summary of significant accounting policies.) Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulation Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Statement 34 "Interim Financial Reporting" endorsed and issued into effect by the Financial Supervisory Commission. Our responsibility is to express a conclusion on the consolidated financial statements based on our review.

## Scope of Review

We concluded our reviews in accordance with Statements of Auditing Standards No. 65 "Review of Financial Information Performed by the Independent Auditor of the Entity". A review of consolidated financial statements consists of making inquiries (primarily of persons responsible for financial and accounting matters), and applying analytical and other review procedures. A review is substantially less in scope than an audit and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

## Conclusion

Based on our review, nothing has come to our attention that caused us to believe that the accompanying consolidated financial statements do not present fairly, in all material aspects the consolidated financial position of the Group as of June 30, 2021 and 2020, and its consolidated financial performance and its consolidated cash flows for the six months ended June 30, 2021 and 2020 in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34 "Interim Financial Reporting" endorsed by the Financial Supervisory Commission.

The Group believes that the adoption of aforementioned IFRSs will not have a significant effect on the consolidated financial position and performance.

## IV. Summary of significant accounting policies

The principal accounting polices applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

### (I) Compliance statement

The consolidated financial statements have been prepared in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers" and International 34 “Interim Financial Reporting” endorsed by the Financial Supervisory Commission.

### (II) Basis of preparation

1. The consolidated financial report has been prepared under the historical cost convention.
2. The preparation of financial statements in conformity with IFRSs requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Group’s accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 5.

### (III) Basis of consolidation

1. The basis for preparation of consolidated financial statements
   (1) All subsidiaries are included in the Group’s consolidated financial statements. Subsidiaries are all entities (including structured entities) controlled by the Group. The Group controls an entity when the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Consolidation of subsidiaries begins from the date the Group obtains control of the subsidiaries and ceases when the Group loses control of the subsidiaries.

   (2) Inter-company transactions, balances and unrealized gains or losses on transactions between companies within the Group are eliminated. Accounting policies of subsidiaries have been adjusted where necessary to ensure consistency with the policies adopted by the Group.

(3) The profit and loss and the components of other comprehensive income attribute to the owners of the parent company and non-controlling interest. The total comprehensive income also attributes to the owners of the parent company and non-controlling interest, even if this results in the non-controlling interests having a deficit balance.

(4) Changes in a parent's ownership interest in a subsidiary that do not result in the parent losing control of the subsidiary (transactions with non-controlling interests) are equity transactions, and they are considered as transactions with owners in their capacity as owners. Any differences between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is directly recognized in equity.

2. Subsidiaries included in the consolidated financial statements:

| | | | Percentage of equity holdings | | | |
|---|---|---|---|---|---|---|
| Name of Investor | Name of Subsidiary | Main Business Activity | June 30, 2021 | December 31, 2020 | June 30, 2020 | Remarks |
| Innodisk Corporation | Innodisk USA Corporation | Industrial embedded storage devices | 100 | 100 | 100 | |

| Innodisk Corporation | Aetina Corporation | Manufacturing and sales of industrial graphics cards | 75.63 | 75.63 | 78.65 | Note 2 |

| Name of Investor | Name of Subsidiary | Main Business Activity | Percentage of equity holdings: June 30, 2021 | December 31, 2020 | June 30, 2020 | Remarks |
|---|---|---|---|---|---|---|
| Innodisk Global-M Corporation | Innodisk Shenzhen Corporaion | Industrial embedded storage devices | 100 | 100 | 100 | |
| Innodisk Europe B.V. | Innodisk France SAS | After-sales services and support of industrial embedded storage devices | 100 | - | - | Note 3 |
| Innodisk Corporation | Antzer Tech Co., Ltd. | Electronic parts and components manufacturing. | 100 | - | - | Note 4 |

Note 1: On June 23, 2020, the Company increased its investment in Innodisk Global-M Corporation, amounting to NT$1,494, and the change registration was completed on June 23, 2020.

Note 2: Aetina Corporation was approved by the shareholder meeting on May 28, 2020 to issue 200,000 shares as a capital increase for employees' remuneration and August 31, 2020 was the capital increase base-date, with the Company's shareholding dropping to 77.54%. In the third quarter of 2020, the Company sold its partial equity interest in Aetina Corporation, and the Company's shareholding decreased to 75.63%.

Note 3: Innodisk Europe B.V. established a subsidiary, Innodisk France SAS, in January 2021.

Note 4: The Company acquired Antzer Tech Co.,Ltd. on May 18, 2021 in the amount of NT$19,889, raising the shareholding from the original 31.89% to 100%; thus, it has been included in the consolidated entities since the date of acquisition.

Note 5: The financial statements of the aforementioned significant subsidiary, Innodisk USA Corporation and other non-significant subsidiaries, which are included in the consolidated entities of the consolidated financial statements for the six months ended June 30, 2021 and 2020, have been reviewed by the Company's auditors.

3. Subsidiaries not included in the consolidated financial report: none.

4. Adjustments for subsidiaries with different balance sheet dates: none.

5. Significant restrictions: none.

6. Subsidiaries that have non-controlling interests that are material to the Group: none.

(IV) Foreign currency translation

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (hereinafter referred to as the "functional currency"). The consolidated financial statements are presented in New Taiwan dollars, which is the Company's functional currency.

1. Foreign currency transactions and balances

(1) Foreign currency transactions are translated into the functional currency using spot exchange rate at the dates of the transactions or valuation where items are re-measured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognized in profit or loss in the period in which they arise.

(2) Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated using spot exchange rate at the balance sheet date. Exchange differences arising from re-translation at the balance sheet date are recognized in profit or loss.

(3) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated using spot exchange rate at the balance sheet date. Their translation differences are recognized in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated using spot exchange at the balance sheet date. Their translation differences are recognized in other comprehensive income. For those which are not measured at fair value, they measured by the historical exchange rate of the initial transaction date.

(4) All foreign exchange gains and losses are presented in the statement of consolidated comprehensive income within "Other gains and losses."

2. Translation of foreign operations

(1) The operating results and financial position of all the subsidiaries that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

A. Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet.

B. Income and expenses for each statement of comprehensive income are translated at average exchange rates of that period.

C. All resulting exchange differences are recognized in other comprehensive income.

(2) Goodwill and fair value adjustments arising on acquisition of a foreign entity are regarded

as assets and liabilities of the foreign entity, and are translated at the closing rate.

(V) Classification of current and non-current items

1. Assets that meet one of the following criteria are classified as current assets:

(1) Assets arising from operating activities that are expected to be realized, or are intended to be sold or consumed within the normal operating cycle.

(2) Assets held mainly for trading purposes.

(3) Assets that are expected to be realized within twelve months from the balance sheet date.

(4) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to pay off liabilities more than twelve months after the balance sheet date.

Those that do not meet the above criteria are considered non-current.

2. Liabilities that meet one of the following criteria are classified as current liabilities:

(1) Liabilities that are expected to be paid off within the normal operating cycle.

(2) Assets held mainly for trading purposes.

(3) Liabilities that are to be paid off within twelve months from the balance sheet date.

(4) Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

Those that do not meet the above criteria are considered non-current.

(VI) Cash equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Time deposits that meet the definition above and are held for the purpose of meeting short-term cash commitments in operations are classified as cash equivalents.

(VII) Financial assets measured at amortized cost

1. Refer to those that meet the following criteria at the same time:

(1) The objective of the business model is achieved by collecting contractual cash flows.

(2) The assets' contractual cash flows solely represent payments of principal and interest.

2. On a regular way purchase or sale basis, financial assets measured at amortized cost are recognized and de-recognized using trade date accounting.

3. The Group measures financial assets at fair value plus transaction costs in the initial recognition. The financial assets are subsequently amortized by the effective interest rate during the circulation to recognize interest income and impairment loss. The profits or losses are recognized in the profit and loss when the assets are derecognized.

4. The Group holds time deposits that are not considered cash equivalents. Due to the short holding period, the impact of discounting is insignificant and is measured by the amount of investment.

(VIII) Accounts and notes receivable

1. Refers to accounts and notes that have been unconditionally charged for the right to exchange the value of the consideration due to the transfer of goods or services.

2. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(IX) Impairment of financial assets

Regarding the financial assets measured at amortized cost, the Group considers all reasonable and supportable information (including forward-looking ones) and measure the loss allowance based on the 12-month expected credit losses for those that do not have their credit risk increased significantly since initial recognition. For those that have increased significantly since initial recognition, the loss allowance is measured based on the full lifetime expected credit losses. A loss allowance for full lifetime expected credit losses is also required for trade receivables that do not constitute a financing transaction.

(X) De-recognition of financial assets

A financial asset is de-recognized when the Group's rights to receive cash flows from the financial assets have expired.

(XI) Leasing arrangements (lessor) -- operating leases

Lease income from operating leases, less any incentives given to the lessee, is amortized in current profit or loss on a straight-line basis over the lease term.

(XII) Inventories

Inventories are measured at the lower of cost or net realizable value, and the cost is determined by weighted-average method. The cost of finished goods and work-in-progress comprises raw materials, direct labor, other direct costs and related production overheads, but excludes borrowing costs. At the end of year, inventories are evaluated at the lower of cost or net realizable value. The item by item approach is used in applying the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less applicable variable costs of completion and selling expenses.

(XIII) Investments accounted for under equity method -- Associates

1. Associates refer to entities over which the Group has significant influence but is not in control. In general, the associates may have more than 20% of their voting shares directly or indirectly owned by the Group. The Group accounts for its investment in associates using the equity method, and the investment is initially recognized at cost.
2. The Group recognizes the profit and loss upon the acquisition of associates as the current profit and loss. Other comprehensive profit and loss after the acquisition are recognized as the other comprehensive profit and loss. When the Group’s share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group will not recognize further losses, unless it has incurred legal or constructive obligations or make payments on behalf of the associate.
3. If an associate has changes in equity not from profit or loss or other comprehensive income, and such changes do not affect the Group's shareholding in the associate, the Group will recognize all changes in equity as "capital surplus" according to the shareholding percentage.
4. Unrealized gains on transactions between the Group and associates are eliminated to the extent of the Group's interest in the associates. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been adjusted where necessary to ensure consistency with the policies adopted by the Group.
5. In the event that an associate issues new shares and the Group does not subscribe to or acquire the new shares in proportion, which results in a change to the Group's shareholding percentage but the Group maintains a significant influence on the associate, the increase or decrease of the Group's share of equity interest is the adjustment of "capital surplus" and "investments accounted for under the equity method." If the investment percentage is reduced, in addition to the above adjustments, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss proportionally on the same basis as would be required if the relevant assets or liabilities were disposed of.
6. When the Group loses its significant influence on an associate, the remaining investment in said associate is re-measured at fair value, and the difference between the fair value and the book value is recognized as profit or loss in the current period.
7. When the Group disposes of an associate, if it loses the significant influence on the associate, all amounts previously recognized in other comprehensive income in relation

to the associate are reclassified to profit or loss on the same basis as would be required if the related assets or liabilities were disposed of. That is, when the Group loses the significant influence on an associate, all gains or losses previously recognized in other comprehensive income in relation to the associate should be reclassified from equity to profit or loss, if such gains or losses would be reclassified to profit or loss when the related assets or liabilities are disposed of. If the Group still has a significant influence on the associate, only the amount recognized in other comprehensive income previously will be transferred out in the manner above on a pro-rata basis.

8. When the Group disposes of an associate, if it loses the significant influence on the associate accordingly, the capital surplus related to the associate will be reclassified to profit or loss; if it still has a significant influence on the associate, the capital surplus will be reclassified to profit or loss according to the percentage of the disposal.

(XIV) Property, plant and equipment

1. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalized.
2. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.
3. Land is not depreciated. Other property, plant and equipment apply cost model and are depreciated using the straight-line method to allocate their cost over their estimated useful lives. Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item must be depreciated separately.
4. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each balance sheet date. If expectations for the assets' residual values and useful lives differ from the previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, "Accounting Policies, Changes in Accounting Estimates and Errors," from the date of the change.

The estimated useful lives of property, plant and equipment are as follows:

| | |
|---|---|
| Buildings and structures | 2 to 50 years |
| Machinery and equipment | 3 to 8 years |
| Office equipment | 2 to 6 years |
| Others | 2 to 6 years |

(XV) Leasing agreements (lessee) - right-of-use assets/ lease liabilities

1. Leases are recognized as right-of-use assets and lease liabilities at the date at which the leased assets are available for use by the Group. For short-term leases or leases of low-value assets, lease payments are recognized as expenses on a straight-line basis over the lease term.

2. Lease liabilities include the net present value of the remaining lease payments at the commencement date, discounted using the incremental borrowing interest rate. Lease payments include fixed payments, less any lease incentives receivables.

   The Company subsequently measures the lease liability at amortized cost using the interest method and recognizes interest expense over the lease term. The lease liability is re-measured and the amount of re-measurement is recognized as an adjustment to the right-of-use asset when there are changes in the lease term or lease payments and such changes do not arise from contract modifications.

3. At the commencement date, the right-of-use asset is recognized at cost comprising the amount of initial measurement of lease liability.

   The right-of-use asset is measured subsequently using the cost model and is depreciated from the commencement date to the earlier of the end of the asset's service life or the end of lease term. When the lease liability is re-measured, the amount of re-measurement is recognized as an adjustment to the right-of-use asset.

4. For lease modifications that reduce the scope of the lease, the lessee reduces the carrying amount of the right-of-use asset to reflect the partial or full termination of the lease and recognizes the difference between this amount and the remeasurement amount of the lease liability in profit or loss.

(XVI) Investment property

Investment properties are initially measured at cost and may be subsequently measured using a cost model. Except for land, the service life is recognized on a straight-line basis of depreciation and is about 24 to 32 years.

## (XVII) Intangible assets

1. Computer software

   Recognized by the acquisition cost and is amortized on a straight-line basis with an estimated service life of 1 to 8 years.

2. Trademarks and patent rights

   Trademarks and patent rights acquired as a result of a business combination are recognized at fair value on the acquisition date. Trademarks and patent rights are assets with a finite useful life and are amortized at the estimated useful life of three years on a straight line basis.

3. Goodwill

   Goodwill is measured in a business combination using the acquisition method.

## (XVIII) Impairment of non-financial assets

1. The Group assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset’s fair value less disposal cost or value in use. When the circumstances or reasons for recognizing impairment loss for an asset in prior years no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortized historical cost would have been if the impairment had not been recognized.
2. Goodwill regularly estimates its recoverable amount. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The goodwill impairment loss will not be reversed in subsequent years.
3. Goodwill is allocated to cash-generating units for the purpose of conducting the impairment testing. The allocation identified based on the operating segment, and the goodwill is allocated to cash-generation units or groups of cash-generation units expected to benefit from the business combination that generates goodwill.

## (XIX) Borrowings

Refers to long- and short-term funds borrowed from banks. Borrowings are recognized initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortized cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognized in profit or loss over the period of the borrowings using the effective interest method.

(XX) Accounts and notes payable

1. Refers to debts incurred as a result of the purchase of raw materials, goods or services and the notes payable due to business and non-business purposes.
2. The short-term accounts and notes payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(XXI) De-recognition of financial liabilities

The Group derecognizes financial liabilities when the obligations specified in the contract are fulfilled, cancelled or expired.

(XXII) Financial assets and liabilities are offset against each other

Financial assets and financial liabilities are offset and presented in the balance sheet on a net basis when there is a legally enforceable right to offset the amount of the recognized financial assets and liabilities and there is an intention to settle on a net basis or to realize the assets and settle the liabilities simultaneously.

(XXIII) Provisions

Liability reserve (which is for warranty) is a present statutory or deferred obligation as a result of a past event. It is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The amount recognized as a provision should be the best estimate of the expenditure required to settle the present obligation at the balance sheet date.

(XXIV) Employee benefits

1. Short-term employee benefits

   Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognized as expenses in that period when the employees render service.

2. Pension

   For defined contribution plans, the contributions are recognized as pension expenses when they are due on an accrual basis. Pre-paid contributions are recognized as an asset to the extent of a cash refund or a reduction in the future payments.

3. Employees' bonuses and directors' and supervisors' remuneration

   Employees’ bonuses and directors’ and supervisors’ remuneration are recognized as expense and liability, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any differences between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in estimates. If employee compensation is distributed by shares, the Company calculates the number of shares based on the closing price at the previous day of the board meeting resolution.

(XXV) Share-based payment to employees

The share-based payment agreement for delivery of equity is a transaction in which employees' labor service is received as consideration for the Company's equity instrument at fair value. It is recognized as compensation costs during the vesting period and the equity is adjusted accordingly. The equity instrument's fair value shall reflect the effects of vesting and non-vesting conditions of market value. The recognized remuneration costs are adjusted in accordance with the expected service conditions to be met and the non-vesting market value conditions, until the final recognized amount is recognized with the vesting amount on the vesting date.

(XXVI) Income tax

1. The tax expense for the period comprises current and deferred tax. Tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or items recognized directly in equity, in which cases the tax is recognized in other comprehensive income or equity.
2. The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Group and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.
3. Deferred income tax is recognized, using the balance sheet method, on temporary differences between the tax bases of assets and liabilities and their carrying amounts in the balance sheet. Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income

tax asset is realized or the deferred income tax liability is settled.

4. Deferred income tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. At each balance sheet date, unrecognized and recognized deferred income tax assets are reassessed.

5. Current income tax assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. Deferred income tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities. They are levied by the same taxation authority on either the same entities or different entities that intend to settle on a net basis or realize the asset and settle the liability simultaneously.

6. The income tax expense for the interim period is calculated by applying the estimated average effective tax rate for the year to the income before tax for the interim period and the related information is disclosed in accordance with the aforementioned policies.

(XXVII) Share capital

Common stocks are classified as equity. Incremental costs directly attributable to the issue of new shares or stock options are shown in equity as a deduction, net of tax, from the proceeds.

(XXVIII) Dividend distribution

Dividends are recorded in the Company’s financial statements in the period in which they are resolved by the Company’s shareholders. Cash dividends are recorded as liabilities. Stock dividends are recorded as dividends to be distributed and transferred to be common stocks on the base date of issuance of new shares.

(XXIX) Revenue recognition

1. Our Group develops, manufactures and sells various products related to industrial storage devices and memory modules. Sales revenue is recognized when the control of products is transferred to customers. That is, once products are delivered to customers, the customers have discretion on the channel and price of product sales, and the Group has no outstanding performance obligations that may affect customers' acceptance of the products. The delivery of products occurs when products are shipped to a designated location and the risk of obsolescence and loss has been transferred to customers, and the customers accept the products in accordance with the sales contract

or have objective evidence that all criteria have been met.

2. The payment terms of sales transactions are usually payment in advance or net 30 to 90. With respect to the contracts signed between the Group and customers, the time interval between the transfer products or services promised to customers and the customers' payment has not exceeded one year, so the Group has not adjusted the transaction price to reflect the time value of money.
3. Sales revenue is recognized as the net from subtracting sales discounts from the contract price. The Group estimates possible sales discounts based on past experience and different contract conditions, and recognizes the refund liabilities accordingly.
4. The Group provides warranty for products sold, and has the obligation to repair product defects, which are recognized as liability provisions when goods are sold.
5. Accounts receivable are recognized when goods are delivered to customers. The Group has unconditional rights to the contract price, and will be able to collect the amount from the customers after the time has passed.

(XXX) Government grants

Government grants are recognized at fair value when there is reasonable assurance that the enterprise will comply with the conditions attached to the government grant and that the grant will be received. If the nature of government subsidies is to compensate the Group for expenses incurred, the government subsidies are recognized in profit or loss on a systematic basis in the period in which the related expenses are incurred.

(XXXI) Business combinations

1. The Group adopts the acquisition method to account for business combinations. The consideration transferred for a combination is measured as the fair value of the assets transferred, the liabilities incurred or assumed, and the equity instruments issued at the acquisition. The consideration for the transfer includes the fair value of any assets and liabilities arising from contingent consideration agreements. All acquisition-related costs related are expensed as incurred. The identifiable assets acquired and liabilities assumed in a business combination are measured at fair value at the acquisition date. For each business combination, the Group measures at the acquisition date components of non-controlling interests in the acquiree that are present ownership interests and entitle their holders to the proportionate share of the entity’s net assets in the event of liquidation at either fair value or the present ownership instruments’ proportionate share in the recognised amounts of the acquiree’s identifiable net assets. All other non-controlling interests should be measured at the acquisition-date fair value.
2. The excess of the consideration transferred, the amount of any non-controlling interest

in the acquiree and the fair value of any previous equity interest in the acquiree over the fair value of the identifiable assets acquired and the liabilities assumed is recorded as goodwill at the acquisition date. If the total of consideration transferred, non-controlling interest in the acquiree recognised and the fair value of previously held equity interest in the acquiree is less than the fair value of the identifiable assets acquired and the liabilities assumed, the difference is recognised directly in profit or loss on the acquisition date.

(XXXII) Operating segments

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of Directors that makes strategic decisions.

## V. Critical accounting judgments and key sources of estimation and uncertainty

The preparation of these consolidated financial statements requires the management to make critical judgments in applying the Group’s accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. Such assumptions and estimates have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year. Please refer to the following explanation of critical accounting judgments and key sources of estimation and uncertainty:

(I) Important judgments adopted by the accounting policies

The critical judgments adopted in the Group's accounting policies have been assessed to be free from significant uncertainty.

(II) Critical accounting estimates and assumptions

Key audit matter –Inventory Evaluation

During the inventory valuation, the Group needs to use judgment to evaluate the wear and tear, obsolescence and market sales value of the inventory to estimate the net realizable value, and write down the inventory cost to the net realizable value. Technological changes, environmental changes and sales conditions will change the inventory value, further affecting its valuation.

As of June 30, 2021, the book value of the Group's Inventories were NT$1,488,981.

2. The Group had no capitalization of interest for property, plant and equipment during the six months ended June 30, 2021 and 2020.
3. The abovementioned property, plant and equipment are all held and used by the Group.

## (VII) Leasing arrangements - lessee

1. The underlying assets leased by the Group include land, buildings and company vehicles. Leasing contracts for buildings and company vehicles are typically made for periods of 1 to 4 years. The land for the plant site in Taiwan is leased from Hsinchu Science Park, and the lease period is 50 years. Lease contracts are negotiated separately and include a variety of terms and conditions. There are no restrictions for the leased assets, except that they cannot be used as loan collateral.

2. The carrying amount of right-of-use assets and the depreciation charge are as follows:

| | Land | Buildings | Company vehicles | Total |

5. Options to extend or terminate leases

In determining lease terms, the Group takes into consideration all facts and circumstances that create economic incentives to exercise an option to extend or terminate leases. The assessment of lease period is reviewed if a significant event occurs which affects the assessment of options to extend or options not to terminate.

## (VIII) Leasing arrangements - lessor

1. The Group leases out assets such as land and buildings. The lease contracts are typically made for periods of 1 to 5 years. The terms of lease contracts are negotiated separately. In order to preserve the condition of leased assets, the Company usually requires lessees not to sublet, sublease or pledge all or part of the underlying leased assets.

2. The gain recognized by the Group based on the operating lease contracts are as follows:

3. Goodwill is allocated to cash-generating units identified by the Group. The recoverable amount is evaluated based on the value in use which is calculated based on the estimated cash flow before taxes.

The Group calculated that the recoverable amount exceeds the carrying amount based on the value in use, so there is no impairment of goodwill. The calculation of value in use mainly considers gross margin, growth rate and discount rate.

The management determines the budgeted gross margin based on past performance and the expectations for market development. The weighted average growth rate used is consistent with the industry's reported forecast. The adopted discount rate is a pre-tax rate and reflects the specific risks of the related operating units.

4. As of June 30, 2021, December 31, 2020, and June 30, 2020, the Group had not provided intangible assets as pledged collaterals.

3. The shareholders’ meeting resolved that the 2019 unappropriated retained earnings of $15,946 would be capitalized to issue new shares on May 29, 2020. The base date for capitalization was August 29, 2020; therefore, the new shares were classified as "stock dividends to be distributed" under the share capital on June 30, 2020.

(XVIII) Capital surplus

In accordance with the Company Act, any capital surplus arising from paid-in capital in excess of the par value on issuance of common stocks can be used to cover accumulated deficit or to issue new stocks or cash to shareholders in proportion to their share ownership, provided that the Company has no accumulated deficit. Further, the Securities and Exchange Act requires that the amount of capital surplus to be capitalized, as above, should not exceed 10% of paid-in capital each year. Capital surpluses should not be used to cover accumulated deficit unless the legal reserve is insufficient.

| | 2021 | | | | | |

## (XIX) Retained earnings

1. According to the Company’s Articles of Incorporation, the surplus income after the final accounts is distributed to the following accounts in their respective order:

   (1) Withholding taxes.

   (2) Make up for past losses.

   (3) Allocate 10% as legal reserve. If the legal reserve has reached the total share capital, no further allocations will be conducted. Special reserve is then allocated or reversed in accordance with the law or regulations of the authority.

   (4) With respect to the balance and the accumulated undistributed surplus of the previous year, the board proposes a surplus distribution to the shareholders meeting for resolution.

2. Dividend policy: The Company considers future needs for business operations, long-term financial planning and shareholders' interest in the dividend policy. As the Company is

currently in the growing stage, considering the future capital expenditure budget and the need for cash, the annual cash dividends will not be less than 10% of the total of cash and stock dividends. The Company's surplus distribution and shareholders' equity shall not be less than 30% of the current year's surplus.

3. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purposes. The use of the legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the distribution of the reserve is limited to the portion in excess of 25% of the Company's paid-in capital.

4. In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings.

5. The Company's distribution of profits

On February 25, 2021, the Board of Directors resolved to approve the distribution of earnings for 2020 and on May 29, 2020, the shareholders' meeting resolved to approve the distribution of earnings for 2019, as follows:

| | 2020 | | 2019 | |
|---|---|---|---|---|
| | Amount | Dividends Per Share (NT$) | Amount | Dividends Per Share (NT$) |
| Legal reserve allocated | $ 93,008 | | $ 101,425 | |
| Allocated special reserve | 1,358 | | 4,080 | |
| Stock dividends | - | - | 15,946 | 0.20 |
| Cash dividends | 553,003 | 6.80 | 597,971 | 7.50 |
| | $ 647,369 | | $ 719,422 | |

The dividend payable has not been reflected in the consolidated financial statements as of June 30, 2021, because the resolution of the proposed distribution of earnings for 2020 has not yet reached the statutory threshold for it to be passed through electronic voting of the shareholders' meeting.

### (I) Capital management

The Group’s objectives when managing capital are to safeguard the Group’s ability to continue as a going concern in order to provide returns for shareholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt. The Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. The total debt is the total liabilities reported in the Consolidated Balance Sheet. Total capital is calculated as "equity" as shown in the Consolidated Balance Sheet, plus net debt.

The Group maintained the same strategy in 2021 as in 2020. The Group’s debt-to-capital ratios as of June 30, 2021, December 31, 2020, and June 30, 2020 were 24%, 22%, and 27%, respectively.

2. Risk management policies

(1) The Group’s activities expose it to a variety of financial risks, including market risk (exchange rate, interest rate and price), credit risk and liquidity risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Group's financial position and performance.

(2) Risk management is carried out by a central treasury department (Group treasury) under policies approved by the senior executives. The Group's treasury department primarily identifies, evaluates and hedges financial risks.

3. Significant financial risks and degrees of financial risks

(1) Market risk

A. Foreign exchange risk

(A) The Group is a multinational operation and therefore is subject to exchange rate risk arising from transactions between the different currencies of the Company and its subsidiaries, mainly in USD, RMB, JPY and Euro. The related exchange risk from future business transactions have been recognized in assets and liabilities.

(B) The Group's management has set up policies to require companies within the

Group to manage their foreign exchange risk against their functional currency. Each company hedges its overall exchange rate risk through its treasury department. Exchange rate risk arises when future business transactions and recognized assets or liabilities are denominated in foreign currencies that are not the entity's function currency.

(C) The Group's operations involve certain non-functional currencies (the Company’s and certain subsidiaries’ functional currency is the New Taiwan dollar (NTD), and for other certain subsidiaries, the functional currency is Euro, USD, JPY and Renminbi (RMB)), so it is subject to the impact of exchange rate fluctuation. The details of assets and liabilities denominated in foreign currencies whose values that would be materially affected by exchange rate fluctuations are as follows:

| | June 30, 2021 | | |
|---|---|---|---|
| (Foreign currency: functional currency) | Foreign currency (in thousands) | Exchange rate | Book value (NT$) |

B. Price risk

The Group does not invest in equity instruments and has not yet had price risk associated with equity instrument investments.

C. Cash flow and fair value interest rate risk

(A) The Group’s interest rate risk arises from short-term and long-term loans. Borrowings issued at fixed rates expose the Group to fair value interest rate risk. Borrowings issued at variable rates expose the Group to cash flow interest rate risk which is partially offset by cash and cash equivalents held at variable rates. During the six months ended June 30, 2021 and 2020, the Group's borrowings at floating rates were denominated in USD and EUR.

(B) For the six months ended June 30, 2021 and 2020, if interest rates had been 1% higher, while all other variables held constant, the profit before income tax for the six months ended June 30, 2021 and 2020 would have been $511 and $105 lower, respectively, mainly due to the higher interest expense on floating rate borrowings.

(2) Credit risk

A. Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments under contract obligations. The defaults are accounts receivable and the contract cash flow from debt instruments measured at amortized cost.

B. The management of credit risk is established with a Group perspective. According to the Group’s credit policy, each local entity in the Group is responsible for managing and analyzing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the management. The utilization of credit limits is regularly monitored.

C. The credit risk of the Group's investment in debt instrument measured at amortized cost refers to counterparties defaulting on contractual obligations, leading to the Group's financial losses. The Group transacts with a variety of financial institutions all with high credit quality to disperse credit risk, so it expects that the probability of counterparty default is remote.

D. In considering the past experience, if the contract payment is overdue for more than 30 days in accordance with the agreed payment terms, the credit risk of the financial asset is significantly increased since the original recognition.

E. In considering the past experience with payment collection, if a contract payment is overdue for more than 180 days in accordance with the agreed payment terms, it is considered a breach of contract.

F. The Group categorizes the accounts receivable from customers based on their evaluation ratings. The loss rate method is adopted as the basis for estimating the expected credit loss.

G. The Group has included the economic indicators and signals of the National Development Council and Basel Committee on Banking Supervision's forward-looking considerations to adjust the loss rate based on historical and current information for a specific period.

H. The Group uses the following indicators to determine the status of credit impairments of debt instruments:

(A) The issuer has suffered significant financial difficulties or is likely to enter bankruptcy or other financial restructuring.

(B) The issuer has suffered significant financial difficulties or is likely to enter bankruptcy or other financial restructuring.

(C) The issuer delays or does not pay for the interest or principal.

(D) Unfavorable changes in the national- or regional-level economic situation resulting in the issuer's default.

I. The Group will continue the recourse for financial assets that have defaulted to protect the rights of the claims. The Group may write off the amount of financial assets that cannot be reasonably expected to be recovered after recourse.

J. The Group has incorporated forward-looking considerations to adjust the loss rate built according to historic and current data in order to estimate the loss allowance notes and accounts receivables. The loss rates are shown as follows:

| | Not past due | Up to 30 days | 31 to 60 days past due | 61 to 180 days past due | More than 181 days past due | Total |
|---|---|---|---|---|---|---|
| June 30, 2021 | | | | | | |
| Expected loss rate | 0.03%~0.08% | 0.03%~0.94% | 0.03%~12.72% | 0.03%~84.76% | 100% | |
| Notes receivable | $ 550 | $ - | $ - | $ - | $ - | $ 550 |

| Accounts receivable | 1,155,893 | 64,918 | 8,364 | 4,954 | 5,970 | 1,240,099 |

| | | | | | | |
|---|---|---|---|---|---|---|
| Total book value | $ 1,158,096 | $ 64,918 | $ 8,364 | $ 4,954 | $ 5,970 | $ 1,242,302 |
| Loss allowance | $ - | $ - | ($ 956) | ($ 653) | ($ 5,970) | ($ 7,579) |

The above is an aging report based on the number of days past due.

K. The Group adopts a simplified method in which the loss allowance for the accounts receivable is shown below:

| | 2021 | 2020 |
|---|---|---|
| | Accounts receivable | Accounts receivable |
| January 1 | $ 1,206 | $ 569 |
| Expected loss on credit impairment | 147 | 7,029 |
| Effects of changes in foreign exchange rates | 18 | ( 19) |
| June 30 | $ 1,371 | $ 7,579 |

(3) Liquidity risk

A. Cash flow forecasting is performed by the operating entities of the Group and aggregated by the Group's treasury department. It monitors rolling forecasts of liquidity requirements to ensure the Group has sufficient cash to meet operational needs.

B. The treasury department of the Group invests the remaining funds in interest-bearing demand deposits, as the instruments chosen have appropriate maturities or sufficient liquidity to provide sufficient headroom as determined by the abovementioned forecasts. As of June 30, 2021, December 31, 2020, and June 30, 2020, the position of money market held by the Group is expected to generate immediate cash flow to manage liquidity risk.

C. The Group does not have derivative financial liabilities. The table below analyzes the non-derivative financial liabilities into relevant maturity groups based on the remaining period at the balance sheet date to the contractual maturity date. Except for those listed in the table, others mature within a year. The undiscounted cash flow amount is equivalent to the amount listed in the balance sheet. The remaining undiscounted cash flow of non-derivative financial liabilities is shown as follows:

| June 30, 2021 | Less than 1 year | 1 to 2 years | 2 to 5 years | Over 5 years | Total |
|---|---|---|---|---|---|
| Non-derivative financial liabilities: | | | | | |
| Lease liabilities (Current/ Non-current) | $ 25,315 | $ 19,290 | $ 26,663 | $ 186,187 | $ 257,455 |
| Long-term loans (including current portion) | 2,534 | 2,505 | 14,019 | - | 19,058 |

| December 31, 2020 | Less than 1 year | 1 to 2 years | 2 to 5 years | Over 5 years | Total |
|---|---|---|---|---|---|
| Non-derivative financial liabilities: | | | | | |
| Lease liabilities (Current/ Non-current) | $ 24,546 | $ 15,654 | $ 27,195 | $ 189,978 | $ 257,373 |
| Long-term loans (including current portion) | 2,691 | 2,662 | 15,602 | - | 20,955 |

| June 30, 2020 | Less than 1 year | 1 to 2 years | 2 to 5 years | Over 5 years | Total |
|---|---|---|---|---|---|
| Non-derivative financial liabilities: | | | | | |
| Lease liabilities (Current/ Non-current) | $ 17,902 | $ 10,348 | $ 6,369 | $ 126,684 | $ 161,303 |
| Long-term loans (including current portion) | 2,571 | 2,543 | 16,584 | - | 21,698 |

(III) Fair value information

1. The Group has no financial instruments measured at fair value. And the book value of the Company's financial instruments is not measured at fair value (including cash and cash equivalents, financial assets measured at amortized cost - current, notes receivable, accounts receivable (including related parties), other receivables (including related parties), other non-current assets - refundable deposits and pledged time deposits, short-term loans, accounts payable (including related parties), other payables, lease liabilities (including current and non-current), long-term loans, other non-current liabilities - guarantee deposit received) is a reasonable approximation of fair value.
2. For fair value information of investment property measured at cost, please refer to Note 6 (9).

(IV) Additional information

In response to the COVID-19 pandemic and the anti-pandemic measures implemented by the government, the Group has adjusted the resources, manpower, and supply chains prudently and flexibly. Meanwhile, we have adopted relevant measures, such as flexible working hours and regular screening, to reduce the impact of the pandemic on the Group's operations. As of August 5, 2021, the changes in the pandemic had not had a significant impact on our operations.
